SUMMARY

Final-year B.Tech Computer Science student (MIT-WPU, 2027) with hands-on experience building and shipping **consumer-facing mobile products** from ideation to launch. Apple WWDC 2026 Winner — shipped **ViCa**, a proximity-based networking product with real users. Experienced in **product requirements, user research, backlog management, sprint cycles**, and **data-driven decision making**. Excited to drive growth for digital-first consumer brands at the intersection of product, analytics, and user experience.

EDUCATION

MIT World Peace University (MIT-WPU) — B.Tech, Computer Science Engineering

2023 – 2027 | CGPA: 8.66 | Entering Final Year from July 2026

SKILLS

Product Management: Product Requirements (PRDs), User Stories, Backlog Management, Sprint Planning, UAT, Roadmapping, MVP Definition

User Research: User Interviews, Persona Development, Customer Journey Mapping, Usability Testing, Feedback Synthesis

Analytics & Data: A/B Testing, Funnel Analysis, Conversion Metrics, Statistical Hypothesis Testing, SQL, Pandas, Google Sheets

Tools: Figma (basic), Notion, Jupyter, Git, Azure, REST APIs, Agile/Scrum

Domain Knowledge: D2C / E-commerce Funnels, Consumer Mobile Apps, Fintech Products, Health Tech, Growth Metrics

EXPERIENCE

Product & Development Intern

[Infosys](#) | Mysore | Apr 2026 – May 2026

- Gathered and documented **business requirements** and translated them into **user stories and acceptance criteria** across 3 product applications (Borrower, Bank, DSA) covering the full loan lifecycle
- Led **sprint planning and backlog management** as Scrum Master — prioritised features, managed timelines, and coordinated cross-functional delivery with engineering and QA teams
- Conducted **UAT and validation activities** to ensure product features met business requirements before release; documented test cases and tracked issue resolution
- Built **analytics dashboards** to surface loan performance metrics, enabling data-driven decisions for product and operations teams

Web Developer & Business Analyst

[Fyntrest \(Fintech Startup\)](#) | Remote | Sept 2024 – Mar 2025

- Partnered with business stakeholders to translate **ambiguous requirements into product specifications** and feature enhancements for a fintech platform
- Performed **data analysis on financial datasets** to surface insights that shaped product and operational decisions
- Supported **reporting and process optimisation** initiatives — designed SQL workflows for analytics and collaborated with engineering to ship data-driven features

PROJECTS

ViCa — Offline Digital Networking App | iOS + Android | Apple WWDC 2026 Winner

- Identified a real user problem — friction in professional and social card-sharing — and designed an **offline-first MVP** from scratch, winning Apple's global Swift Student Challenge 2026
- Defined **user personas** (personal, business, social, event) and mapped **end-to-end customer journeys** for each use case; built proximity-based sharing with event-mode for multi-user exchanges
- Owned the **product roadmap**: shipped iOS MVP, designed Android expansion plan, and scoped enterprise features (team cards, B2B licensing, cross-platform sharing)
- Iterated on UX based on **user feedback**, balancing privacy-first design with seamless onboarding — core consumer brand principles

PCOS AI Health App | iOS | Apple x Infosys Developer Program | Patent Filed

- Conducted **product discovery** around PCOS management challenges; defined requirements for symptom tracking, diet, sleep, and AI-driven personalised recommendations
- Designed **user journeys** across 4 app tabs (Home, Diet, Workout, AI chatbot Adira); prioritised features based on user impact and development feasibility
- Leveraged analysis of **10,000+ health records** to inform recommendation relevance — data-driven product iteration from day one
- Filed **patent** for AI-powered personalised health recommendation engine — end-to-end product ownership from concept to IP

E-Commerce A/B Testing & Funnel Optimisation | Python, Pandas, SciPy

- Built **user-level conversion funnel metrics** (view → click → cart → purchase) and identified drop-off points across the customer journey — directly applicable to D2C brand growth
- Ran **statistical A/B tests** and confidence interval analysis on 50k+ user sessions; created dashboards and delivered **data-backed rollout recommendations**

Loan Management System | Infosys Internship Project

- Wrote **PRDs and user stories** for loan lifecycle workflows (application, verification, approval, disbursement, repayment) across 4 role-based user types
- Designed **approval pipelines and role-based workflows**; collaborated with engineering in Agile sprints to deliver features end-to-end

ACHIEVEMENTS

- ■ **Apple WWDC Swift Student Challenge 2026 Winner** — Global competition; shipped ViCa, a real consumer product with end-to-end ownership
- ■ **Patent Filed** — AI-Powered PCOS Health Recommendation System (ML + personalization engine)
- ■ **Hackathon Finalist** — Smart India Hackathon (SIH), InnovationHub
- ■ **WorldQuant IQC Participant** — Quantitative alpha strategy research and statistical modelling
- ■ **Head, Trademaxx Club** (Finance & Tech) — Led member workshops on product thinking, analytics, and consumer tech
