## EDUCATION

---

**MIT World Peace University (MIT-WPU)** — B.Tech, Computer Science Engineering *Pune* | 2023 – 2027 | CGPA: 8.66

## SKILLS

---

**Product Management:** Product Roadmapping, PRDs & User Stories, Backlog Management, Sprint Planning, UAT, Feature Prioritization, OKR Tracking, User Research, Customer Journey Mapping, MVP Definition, Stakeholder Management

**Analytics & Data:** A/B Testing, Funnel Analysis, Conversion Metrics, Statistical Hypothesis Testing, KPI Dashboards, SQL, Python (Pandas), Product Metrics

**AI & Technical:** LLM Integration, Prompt Engineering, RAG, REST APIs, Agile / Scrum, Figma (basic), Azure, Git

**Domain:** Fintech, Health Tech, Consumer Mobile, Agentic AI, B2B SaaS, D2C Growth

## EXPERIENCE

---

**Founder & Product Lead** · [Cyster — AI Health Platform](#) *Pune* | 2025 – Present | [Android version](#)

[Test link for iOS: <https://testflight.apple.com/join/5gXW68Jn>]

- **Founded AI-powered PCOS health companion** — led end-to-end product lifecycle from discovery and problem definition through MVP, beta launch, and commercial launch preparation; patent filed
- **Defined product roadmap across 4 modules** (Home, Diet, Workout, Adira AI chatbot); ran user interviews, prioritized features by impact, iterated UX from TestFlight feedback; set KPIs (activation streak, recommendation relevance)
- Built 3-phase AI recommendation engine: rule-based → statistical confidence scoring (10k+ records) → LLM-integrated personalized inference; scaled to real users on TestFlight

**Product & Development Intern** · Infosys *Mysore* | Apr – May 2026

- **Gathered requirements across 3 product applications** (Borrower, Bank, DSA); translated loan lifecycle needs into PRDs, user stories, and acceptance criteria before any development began
- **Led sprint planning and backlog prioritization as Scrum Master** — balanced new features, bug fixes, and stakeholder requests; ran UAT and tracked issue resolution pre-release
- Built analytics dashboards surfacing loan portfolio KPIs; defined product metrics for data-driven ops and management reporting

**Business Analyst** · Fyntrest (Fintech Startup) *Pune* | Sept 2024 – Mar 2025

- Translated ambiguous B2B fintech requirements into product specs; designed SQL analytics workflows; shipped data-driven features in Agile sprints

## PROJECTS

---

**ViCa — Proximity Networking Platform** / [\[Android version\]](#) / Swift · BLE · iOS + Android / **Apple WWDC 2026 Winner** / Public Beta

- **Owned full product roadmap** — problem discovery, 4 user personas, customer journey maps, Event Mode for multi-user exchange, iOS MVP shipped, Android in beta, enterprise roadmap (B2B licensing, team cards) scoped

**E-Commerce A/B Testing & Funnel Optimization** / Python · Pandas · SciPy · SQL

- Built conversion funnel metrics (view→click→cart→purchase) on 50k+ sessions; ran statistical A/B tests; delivered data-backed rollout recommendations

## ACHIEVEMENTS

- 
- Apple WWDC Swift Student Challenge 2026 Winner — ViCa; global selection, real users
  - Founder, Cyster — Patent filed; AI health platform preparing for commercial launch
  - WorldQuant IQC Participant — Quantitative alpha research and statistical signal analysis

- Smart India Hackathon Finalist | Head, Trademaxx Club (Finance & Tech) — MIT-WPU
